

In the name of God, the Most Gracious, the Most Merciful

A century and a quarter of the French occupation has passed through Algeria, this is the occupation that has looted his wealth, used the most heinous means to suppress every resistance, and tried by all means to destroy the Algerian people. Despite the great sacrifices made by the Algerian people in order to defend their dignity and identity, the colonialists continued to marginalize, ignore and exclude.

In front of this situation, and in front of the failure of all peaceful political conflicts to achieve independence, the Algerian people chose armed struggle as a single way to extract its legitimate right to freedom and independence. Colonialism did not negotiate, and even faced legitimate demands with repression, arrest and killing.

Therefore, the National Liberation Front announces to the Algerian people and the whole world to launch the Algerian revolution. And calls on all Algerians, as they differ from their categories and their affiliations, to circumvent them and to work for the homeland and the retrieval of national sovereignty. The Algerian revolution is a popular revolution aimed at achieving a sovereign independent country.

This desired country will be an Algerian, democratic, social democratic within the framework of Islamic principles. Without ethnic or religious discrimination. The National Liberation Front will seek to mobilize all national energies and work within the framework of international covenants and the United Nations Charter.

O Algerian people, the hour of work has been entertained, and we depend on you at this decisive stage of the revolution. The Mujahideen, and contribute to the liberation of your country and the restoration of your dignity. Victory is yours.
